Goal to reduce emissions **50%** by 2035

San Diego has set a new national standard for climate action and presents a bold vision for our future. We have committed to cutting greenhouse gas (GHG) emissions in half by 2035. We are also one of the first and largest cities in the nation to commit to 100% renewable energy. We are a Smart City making better use of resources, sustainability and technology. Our first sustainability annual report shows how far we've come. Learn more at www.sandiego.gov/sustainability
